

TAKE YOUR **MALARIA** **PILLS**

before, during & after **deployment**

PROTECT YOURSELF & PREVENT MALARIA

Wear a factory-treated Army Combat Uniform (ACU Permethrin).*

Apply DEET or Picaridin repellent to all exposed skin.

Properly wear your uniform.

DOD INSECT REPELLENT SYSTEM

Use a permethrin-treated bed net.

Take your malaria pills before, during and after your deployment.

*The Army Physical Fitness Uniform (APFU) is not treated with permethrin. It **does not protect** Soldiers from insects.

TA-228-0415

TAKE YOUR **MALARIA** **PILLS**

before, during & after **deployment**

Malaria is a potentially life-threatening disease caused by parasites that are transmitted to people through mosquito bites.

Many malaria pills are taken daily. Take your malaria pills as directed by your healthcare provider.

Take your malaria pills before, during and after your deployment to kill all of the parasites in your body.

The DOD Insect Repellent System is a proven method to protect Soldiers from insects. *(see other side)*

FACT

Unless you **finish all of your pills** after you return home, you may get sick months or days later.
